

ACCORDION SHUTTERS

Our Supernova accordion shutter systems are made from high quality aluminum for longevity and performance built to withstand category 5 Hurricane force winds.

SuperNova Accordion Shutters

Accordion hurricane shutter “curtains” are stored to the side of the exterior window frame and are easily closed for quick coverage during Florida’s hurricane season.

When fully open, the shutter blades fold compactly to the sides, allowing you to have full use of the light and beauty your windows have to offer.

- Accordion Shutters offer exceptional protection in a self-storing system.
- Affordable Protection.
- Easy to operate.
- Convenient locking system provides excellent security protection.
- No locking rods required.

(FL16893)

Can enclose entire balconies with one shutter

TDI approved shutters

Quality & Reliability

SuperNova Accordion Hurricane Shutters are permanently affixed structures that only need to be installed once. SuperNova Shutters are tested and approved for use in the HVHZ. Designed for extreme weather protection, these shutters are certified to resist impacts from Category 5 hurricane winds exceeding 157 MPH. The state-of-the-art SuperNova shutter system surpasses the stringent Florida state code for hurricane protection, ensuring your safety in even the most severe tropical storms.
